SUMMARY

Curious and motivated graduate interested in research that applies computer science and engineering to real-world problems. I want to build skills in AI/ML, networking, distributed systems, and wearable health technologies.

EDUCATION

Bachelor of Science – Computer Engineering. 2019 - 2023

Kwame Nkrumah University of Science and Technology, Ghana.

Academic Standing: Second Class Upper.

Relevant Modules: Software Engineering, Computer Networking, Secure Network Systems, Digital Signal Processing, Distributed Computing, Database and Information Retrieval.

RESEARCH EXPERIENCE

Undergraduate Thesis | Title: Enhancing Drug Accessibility through the Development of Online Pharmacy. 2023

- Led the development of an online pharmacy web application that helped KNUST students find and buy from registered pharmacies.
- Reviewed research articles about online pharmacies and access to medicines.
- Built the front end with HTML, CSS, and JavaScript, the back end with Python FastAPI, designed the UI in Figma, and used PostgreSQL for the database.

Research Assistant to Professor E.T Tchao | Title: Determining Food Adulteration in Palm Oil. 2023

- Assisted in building a neural network model to detect food adulteration.
- Examined samples of palm oil sold by market vendors, which were often mixed with chemicals to enhance their red colour.
- Collected images of both pure and adulterated palm oil and used them to train the neural network model.

Third-Year Project Work | Title: VHDL Implementation of the PRESENT Cipher. 2022

- Reviewed research papers on cryptographic techniques.
- Studied different types of ciphers and focused research on the PRESENT Cipher.
- Implemented the PRESENT Cipher using VHDL.

WORK EXPERIENCE

Quality Assurance Engineer | AmaliTech Ghana. Apr 2025 - Dec 2025

- Prepared test documents such as test plans, test strategy documents, and test cases.
- Tested mobile applications using Appium web applications using Selenium, Selenide and Junit.
- Performed performance testing with JMeter and security testing with OWASP ZAP.
- Built and maintained CI/CD pipelines to run automated tests after each GitHub push.

IT Support Analyst | KNUST E-Learning Centre. Nov 2023 – Oct 2024

- Helped students and lecturers resolve login issues on the KNUST online learning platform.

- Repaired faulty electrical devices at the center.
- Supported the Publicity Department in live-streaming campus events.
- Tutored over 400 first-year students on how to use the university's online learning platform.

Back End Developer | Universal Vision Technologies Inc. – UviTech.

Oct 2022 - Dec 2022

- Worked as a back-end developer, graphic designer, and UI/UX researcher and designer for a transport web app project.
- Used Laravel 8 for the back end, PostgreSQL for the database, Figma for the UI design, and Adobe Photoshop to create flyers for product promotion.

Electrical Repairer | ABE Electricals.

Feb 2021 - Aug 2023

- Co-founded an electrical repairs startup, while studying at KNUST after receiving professional training from a certified technician.
- Repaired appliances such as rice cookers, kettles, extension boards, microwaves, blenders, and electric hotplates at affordable prices on campus.

SKILLS

Technical Skills: Programming languages (Python, C, Java, MATLAB, VHDL),

Soft Skills: Research, teamwork, collaboration, and presentation skills.

AWARDS AND RECOGNITIONS

- **Mentorship Tutor Recognition** – Honoured for mentoring and supporting 400 first-year students in adapting to university learning systems.
- **Research Presentation** – Presented findings on *Online Pharmacies and Drug Accessibility* at the KNUST Student Research Forum.

CERTIFICATIONS

- [AWS Certified Cloud Practitioner \(AWS CLF C02\).](#)
- [Google Cybersecurity Certification.](#)
- [Google UX Design Certification.](#)
- [Supervised Machine Learning: Regression and Classification.](#)

VOLUNTEERING/ LEADERSHIP EXPERIENCE

Peer Tutor

- Taught six learners with no computer background in Python and Java (OOP) and helped them build small projects within seven weeks.
- Created and explained step-by-step lessons that helped all learners write basic Python and Java programs.

Student Mentor | Computer Engineering Students Association.

- Mentored four first-year students during my final year, taught them Python basics, and guided them through a hands-on mini project.
- Encouraged regular coding practice, peer discussions, and step-by-step problem-solving to build their programming confidence.

Hostel Floor Manager

- Served as the first point of contact for student welfare issues within the hostel.
- Wrote down students' concerns and shared them with the hostel manager so they could be solved quickly.
